Application/Control Number: 10/575,392 Page 2

Art Unit: 1796

1. It is noted that Applicants' **IDS** (2 pages) filed on March 9, 2007 was received. It is also noted that this US Application is from 371 **PCT/US03/32090** filed on October 7, 2003. No pre-amendment or drawing is applied. **Claims 1-16 with a total of three independent claims** (Claim 1, Claim 8 and Claim 13) are now pending. An action follows.

DETAILED ACTION

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1, this is based on the preliminary search done by the examiner as well as by examining the references cited in international search report and IDS filed by Applicants. It is noted that all three independent claims are marked with an underline and are combined with its dependent claims.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted as following:

I. Claims 1-7, drawn to a one-layer coating system (for coating substrate) comprising a fluorinated terpolymer of VF₂/TFE/HFP with the molar ratio as specified.

Application/Control Number: 10/575,392

Art Unit: 1796

II. Claims 8-12, drawn to a quite different one-layer coating system (for coating substrate) comprising a fluorinated dipolymer of VF₂/HFP with the molar ratio as specified.

Page 3

- III. Claims 13-16, drawn to a quite different one-layer coating system (for coating substrate) comprising a fluorinated terpolymer of VF₂/TFE/PMVE with the molar ratio as specified.
- 3. Where the group of inventions is claimed in one and the same international application, the requirement for unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions considered as a whole, makes over the prior art. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, although they share the special technical feature, this special technical feature does not define a contribution over the prior art for the following reasons:
- 4. In view of international search report for <u>PCT/US03/32090</u> filed on April 6, 2006 by Applicants, Examiner's own prior art search as well as the references or articles cited in **one <u>IDS</u>** filed on March 9, 2007 by Applicants, Claims 1-16 is either obvious or anticipated by following:

Application/Control Number: 10/575,392 Page 4

Art Unit: 1796

Bowers et al. (US 6,329,469 B1) and Albano et al. (US 5,639,838) for the use of terpolymer TFE/VF₂/PMVE (Group III), Hochgesang et al. (US 2004/0048983 A1 and Duane et al. (US 3,573,976) for the use of dipolymer VF₂/HFP (Group II). In summary, these three groups have no common features in the preparation as well as its application since they are structurally different. The scope of the claims, i.e., the metes and boundaries are distinct. Accordingly, the special technical feature linking the inventions, each one-layer coating system from Group I, Group II and Group III does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore the restriction is appropriate.

- 5. With respect to the fact that "both groups are <u>structurally different</u> each other", Group I was drawn to the coating of a <u>fluorinated terpolymer of VF₂/TFE/HFP</u>, Group II was drawn to the coating of a <u>fluorinated terpolymer of VF₂/HFP</u>, while Group III was drawn to the coating of a <u>fluorinated terpolymer of VF₂/TFE/PMVE</u>. The same co-monomer such as TFE may be used, the result polymers are distinct each other. Attention is directed to the fact that <u>the individual property of monomers will not be shown in its polymers mainly due to tremendous difference in molecular weight</u>. Additionally, fluoropolymer and its process of making are unique and thereby not interchangeable.
- 6. Because these inventions are distinct for the reasons given above shown as different subject matters and the search required for each group is not required for other groups have

Application/Control Number: 10/575,392

Art Unit: 1796

acquired a separate status in the art as shown by their different classification, restriction for

Page 5

examination purposes as indicated is proper.

7. It is noted that no phone call was made to Gail A. Dalickas (registration # 40,979, tel:

302 992-4947) by the examiner due to the complexity on multiple (three) distinct groups.

Applicant is advised that the reply to this requirement to be complete must include an election of

the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Application/Control Number: 10/575,392 Page 6

Art Unit: 1796

10. Any inquiry concerning this communication or earlier communication from the examiner

should be directed to Dr. Henry S. Hu whose telephone number is (571) 272-1103. The

examiner can be reached on Monday through Friday from 9:00 AM -5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Dr. Vasu Jagannathan, can be reached on (571) 272-1119. The fax number for the

organization where this application or proceeding is assigned is (571) 273-8300 for all regular

communications. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status information for

unpublished applications is available through Private PAIR only. For more information about

the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the

Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
